Alzchem Group AG has expanded its product range with an innovative product developed specifically for active people: Creapure® Gluco. This novel combination of the proven Creapure® (highly pure creatine monohydrate) and glucose ("dextrose") offers an immediate energy supply and improved creatine absorption in the form of a handy chewable tablet.

With Creapure® Gluco, active people can enjoy the benefits of an optimized creatine supply anytime, anywhere – whether traveling, during training or in everyday life.

The key benefits of Creapure® Gluco at a glance:

- Energy boost: Glucose provides an immediate energy boost, while Creapure® ensures long-lasting cellular energy.
- Improved creatine absorption: the combination with glucose increases the absorption rate of creatine, maximizing the effect.
- Convenient "grab and go" product: No water required – ideal as a convenience food supplement
- Refreshing taste: The lemon or raspberry flavor makes for a delicious and fruity treat. There is something for every taste.
- Premium quality: Thanks to a patented manufacturing process made in Germany, the product offers a particularly pleasant mouthfeel.

"With Creapure® Gluco, we offer our customers a convenient way to meet their creatine needs flexibly and easily. This innovation represents an important milestone in our strategy of developing high-quality and user-friendly products," explains Martina Spitzer, CSO of Alzchem Group.

The product has already been successfully launched on the market and is available from the first retail partners.

About Creapure®

Creapure® is the leading brand of creatine monohydrate, produced by the Alzchem Group in Germany. The company is the only producer of creatine outside Asia and manufactures it in specially built production facilities in Chiemgau, Bavaria. The production is certified according to the food certification standard FSSC 22000, a standard recognized by the "Food Safety System Certification". Creapure® is used by top athletes worldwide in a wide range of sports.

About Alzchem

Alzchem is a globally active specialty chemicals company that is one of the market leaders in most of its fields of activity. Alzchem offers answers to various global developments such as climate change, population growth and increasing life expectancy. We deliver solutions through brands and products of the highest quality and through a sustainable vision to help shape global developments.

The company sees interesting growth prospects for itself in the areas of human and animal nutrition and agriculture in particular. As a result of population growth, it is necessary to achieve efficient food production. Pharmaceutical raw materials and creatine products can contribute to a healthy old age as life expectancy increases. Alzchem is facing up to the goal of sustainability arising from climate change in the field of renewable energies and across the entire company. The fields of fine chemicals and metallurgy offer just as great a perspective.

Alzchem Group AG's broad product range includes dietary supplements, precursors for PCR tests and pharmaceutical raw materials. These offerings are the company's response to global trends and developments. Alzchem is ideally positioned in this respect and considers itself well prepared for an environmental future and global developments.

The company employs around 1,690 people at four production sites in Germany and a plant in Sweden, as well as three sales companies in the USA, China and England. Alzchem generated Group sales of EUR 540.6 million and EBITDA of EUR 81.4 million in 2023.
